DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 10-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 10 claims a "single component photoresist composition". It is unclear as to how a photoresist composition could be prepared having only the polymer/copolymer, and contain no other additives such as a solvent.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-8 are indicated as containing allowable subject matter as applicant cancelled claim 9 which was objected to in the previous office action and incorporated its limitations into the independent claim 1. Therefore, the instant claims 1-8 are indicated as being allowable over the prior art of record as the prior art of record fails to teach or suggest to one of ordinary skill in the art to prepare the material of the instant claim 1 wherein the dissolution rate of the photoresist composition in aqueous base is less than about $1.3 \times 10^{-4} \mu\text{m/sec}$.

Art Unit: 1752

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Emoto et al (5,908,721) is cited for its teaching of a light-shading colored ink comprising a resin having a monomer unit having a quarternary ammonium salt moiety, however, the resin the reference fails to meet the instant claim limitations.
